DaVinci Resolve Film Editing
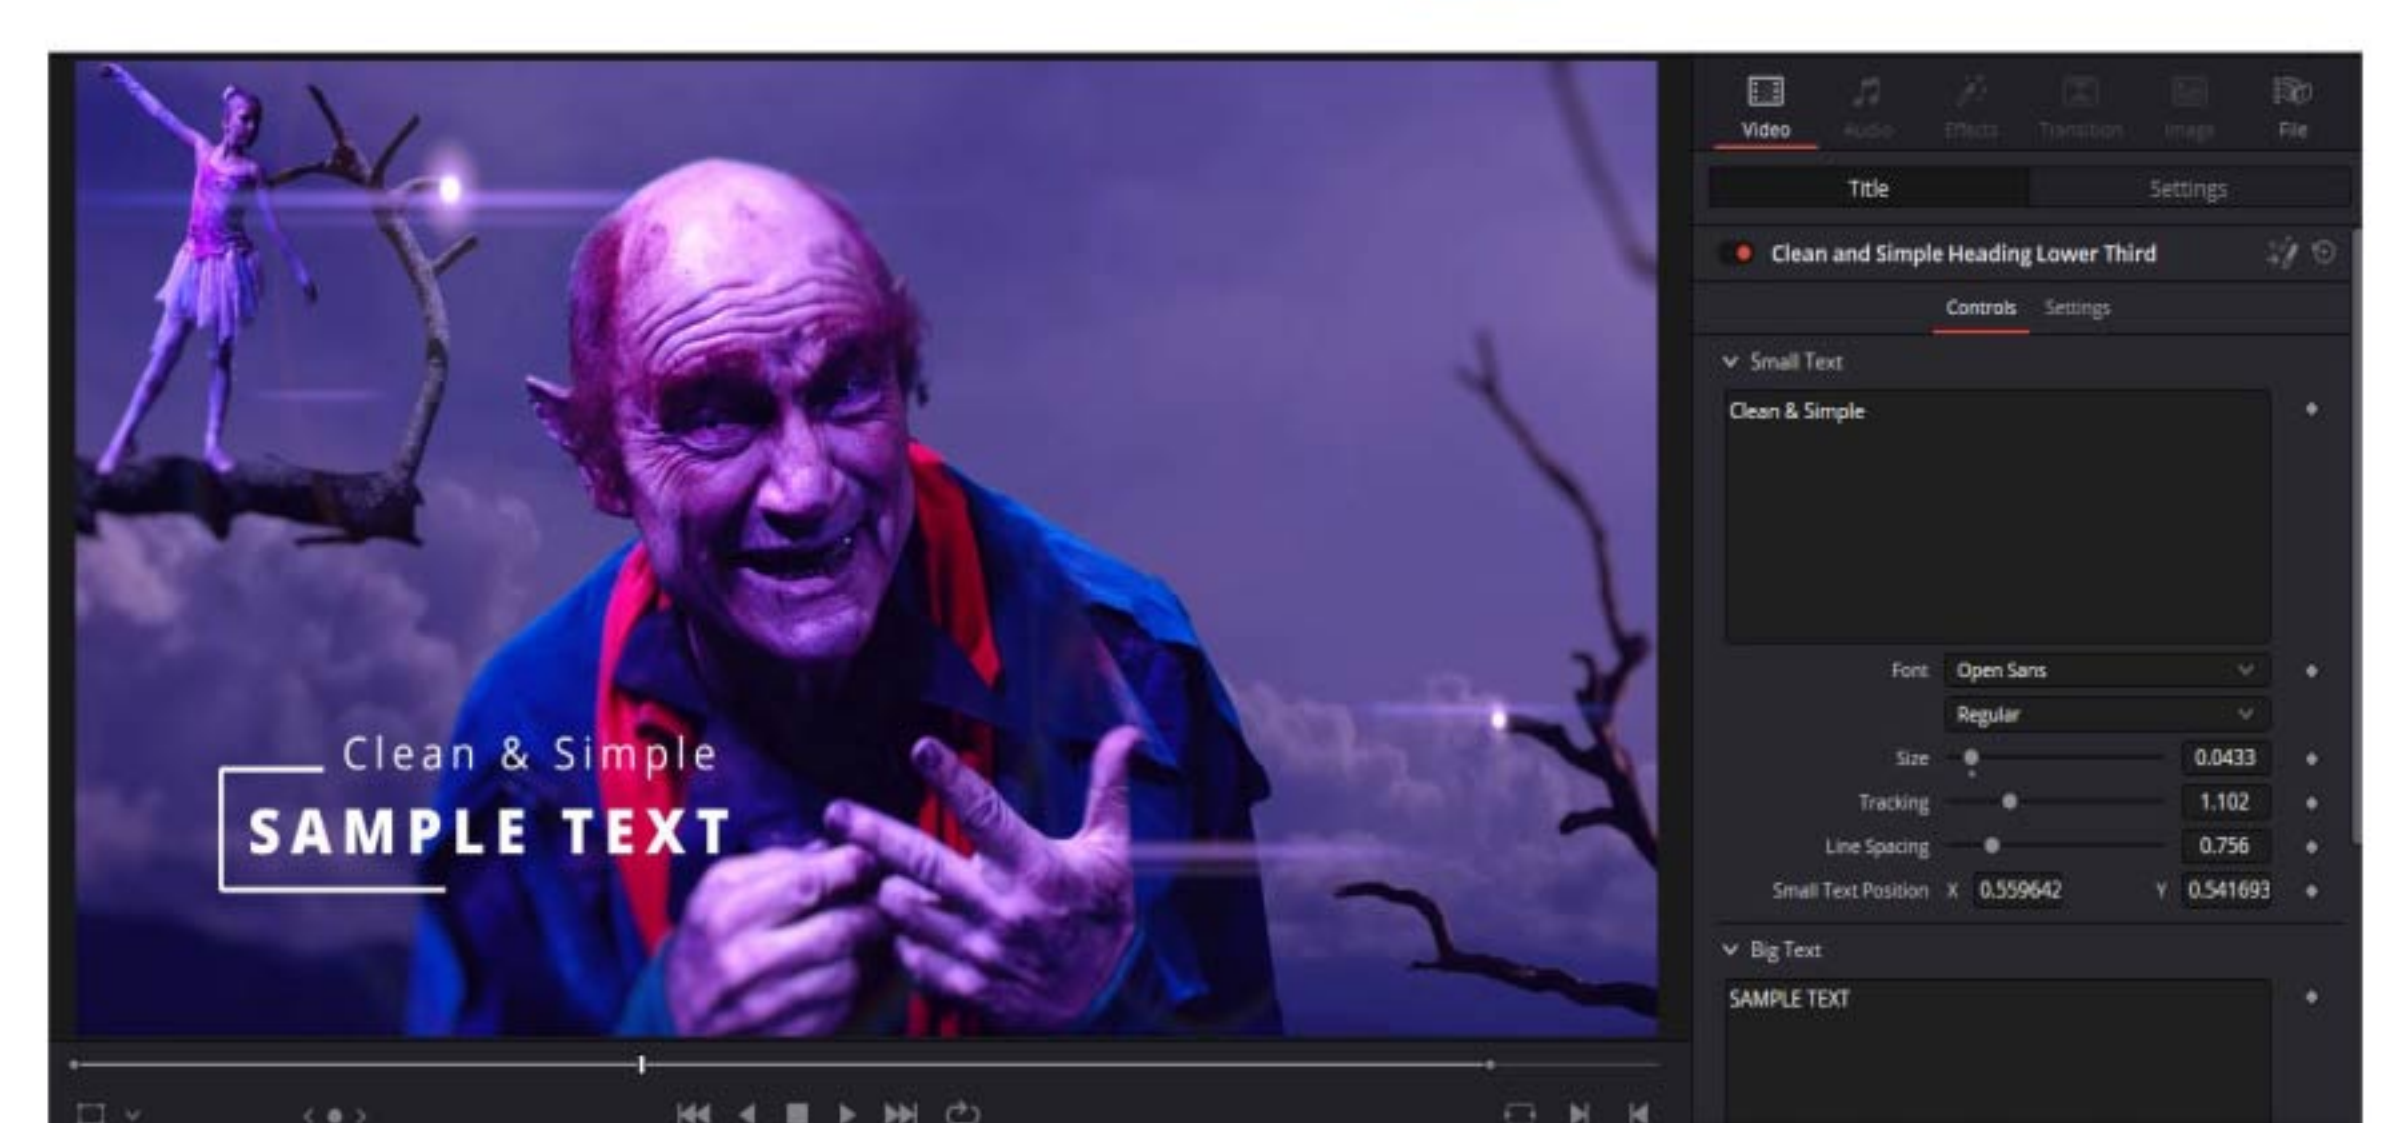

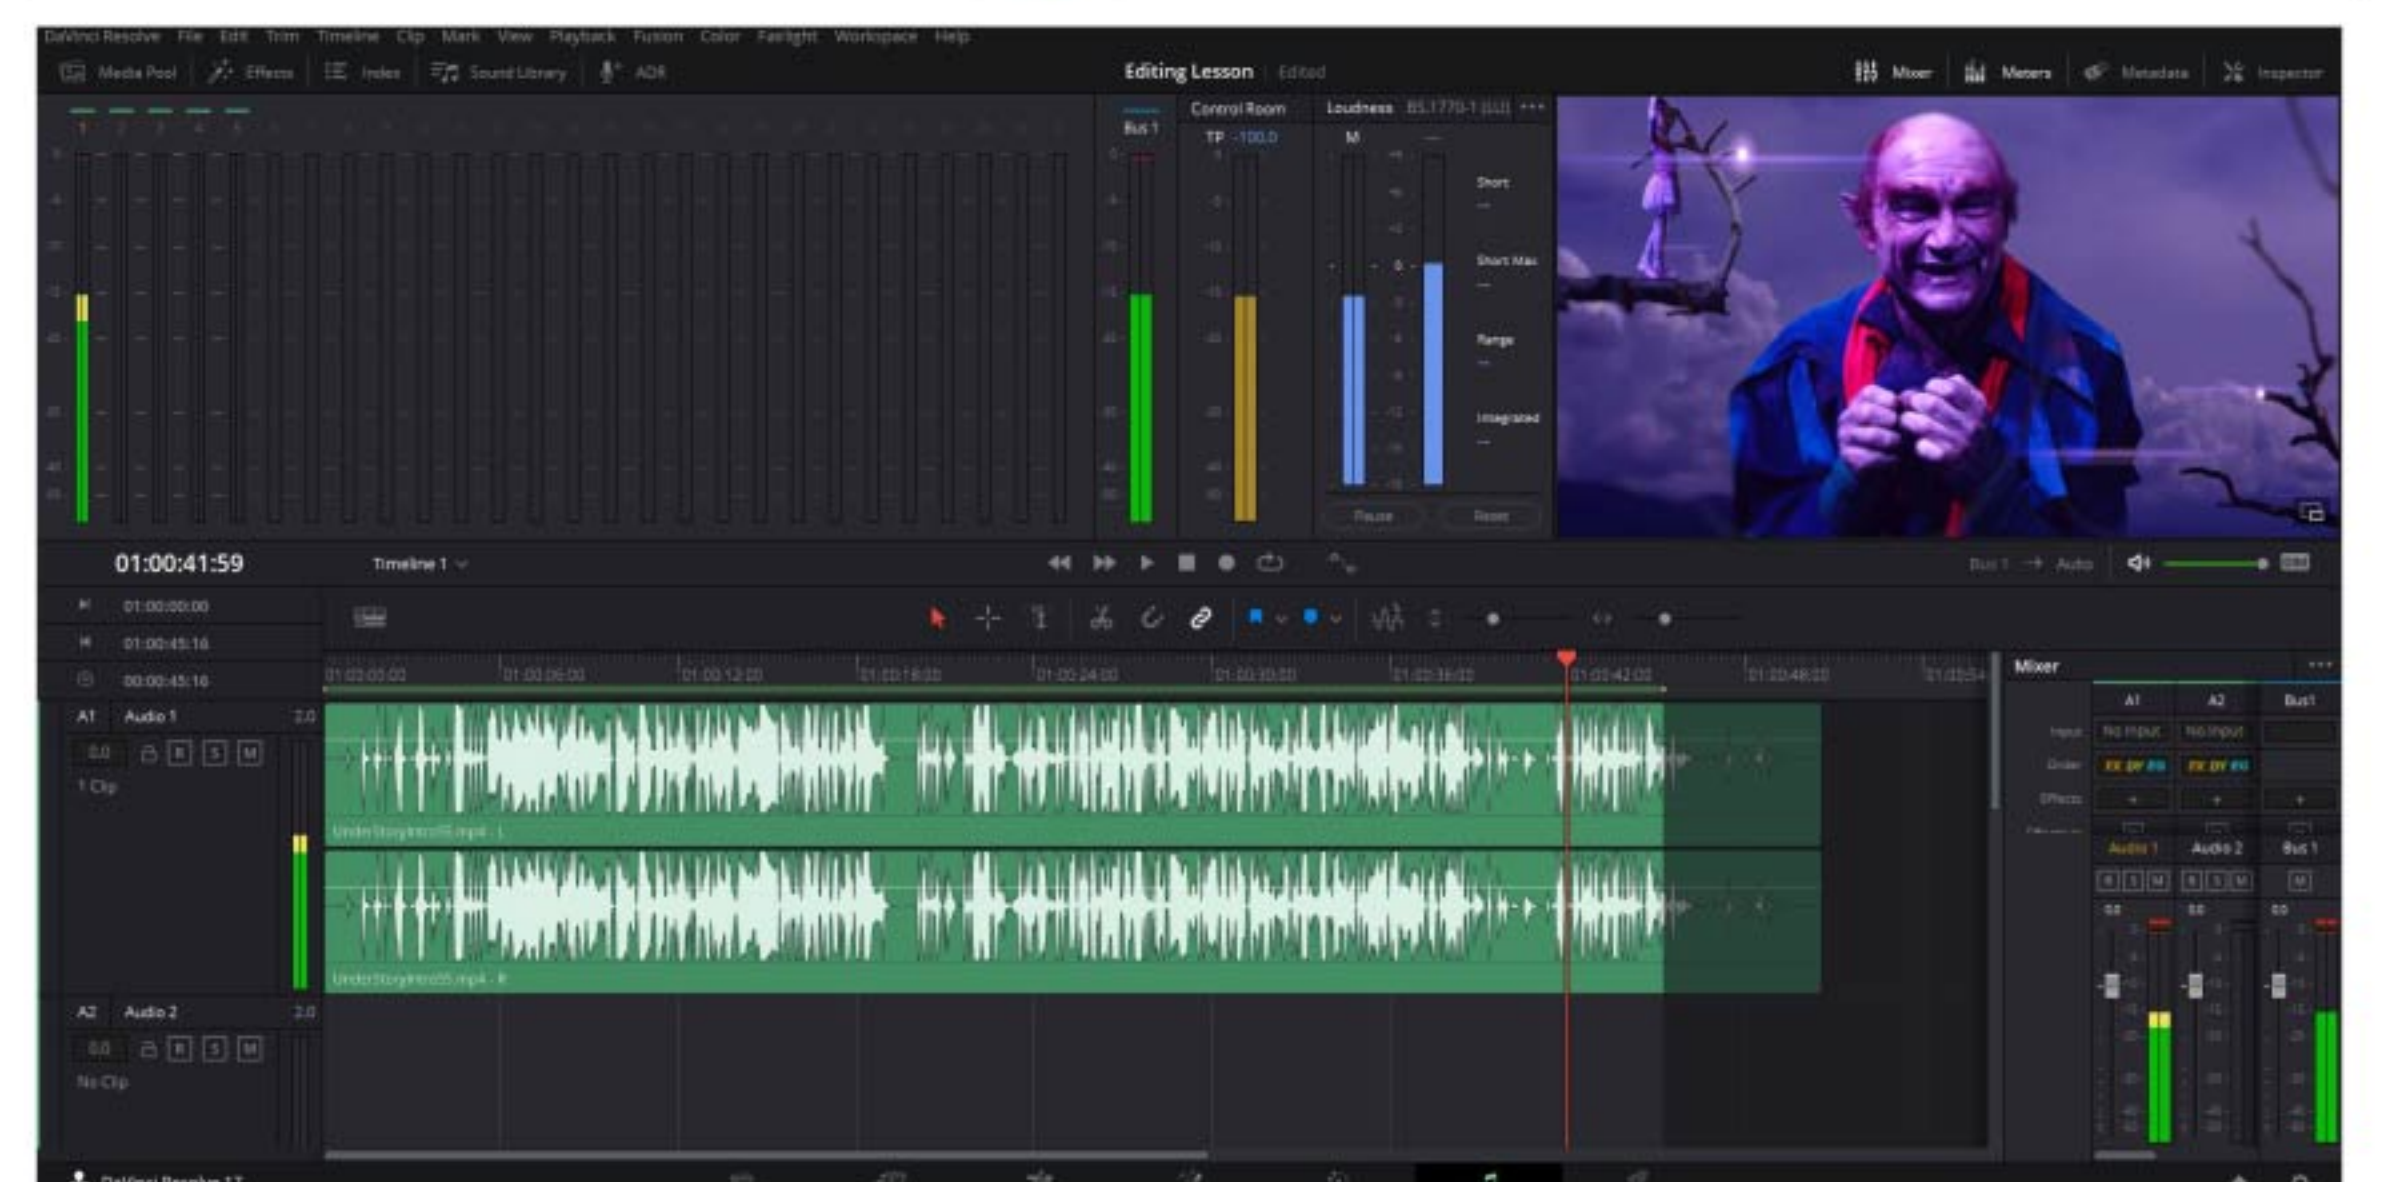

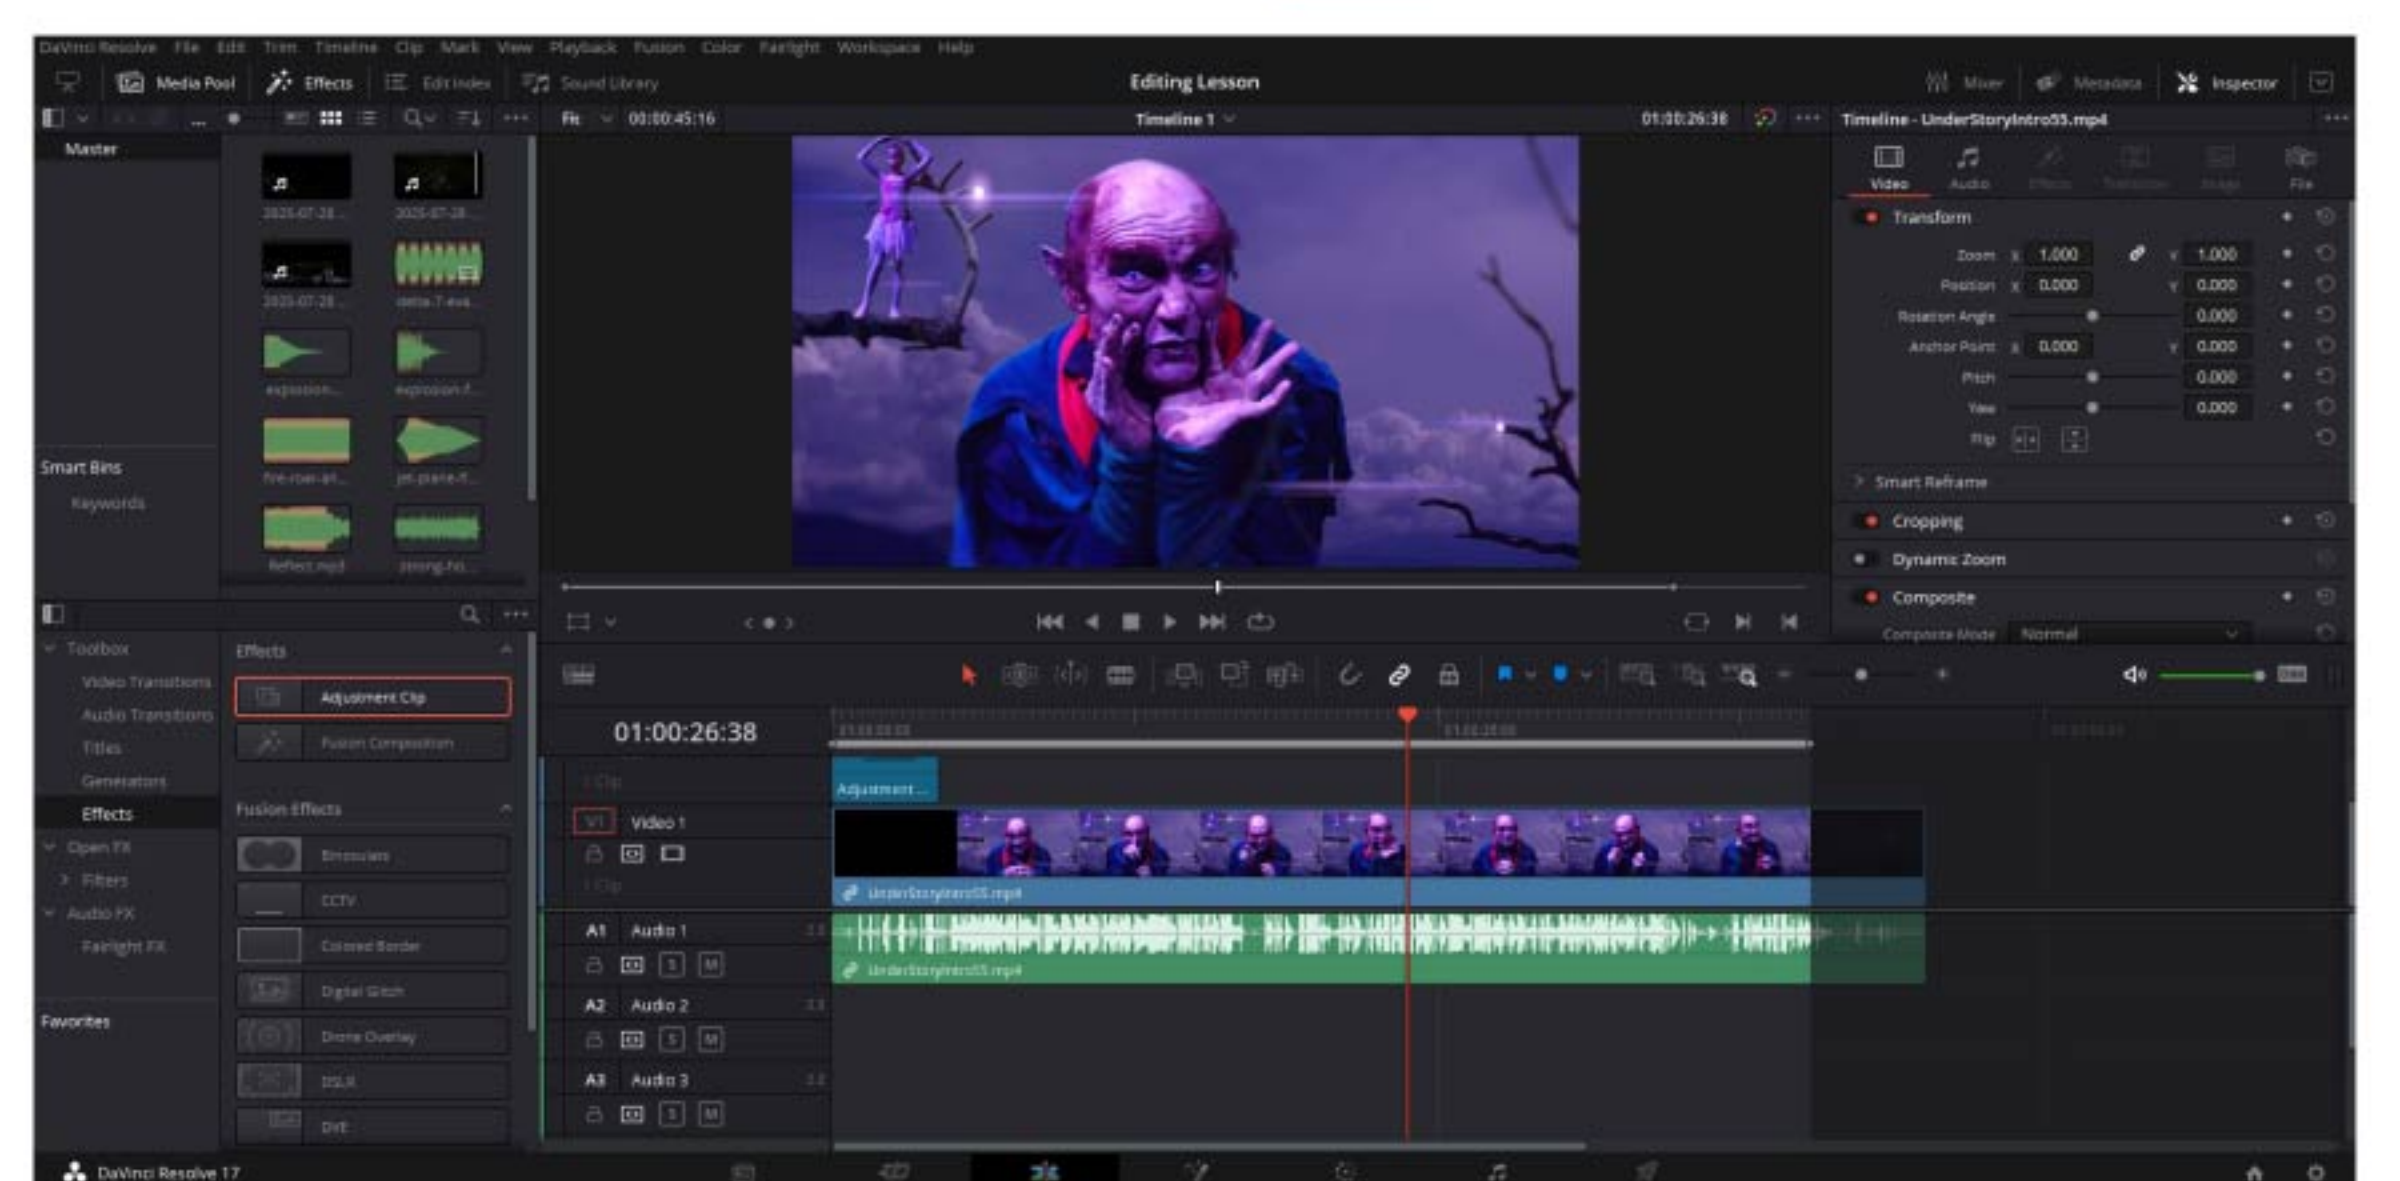

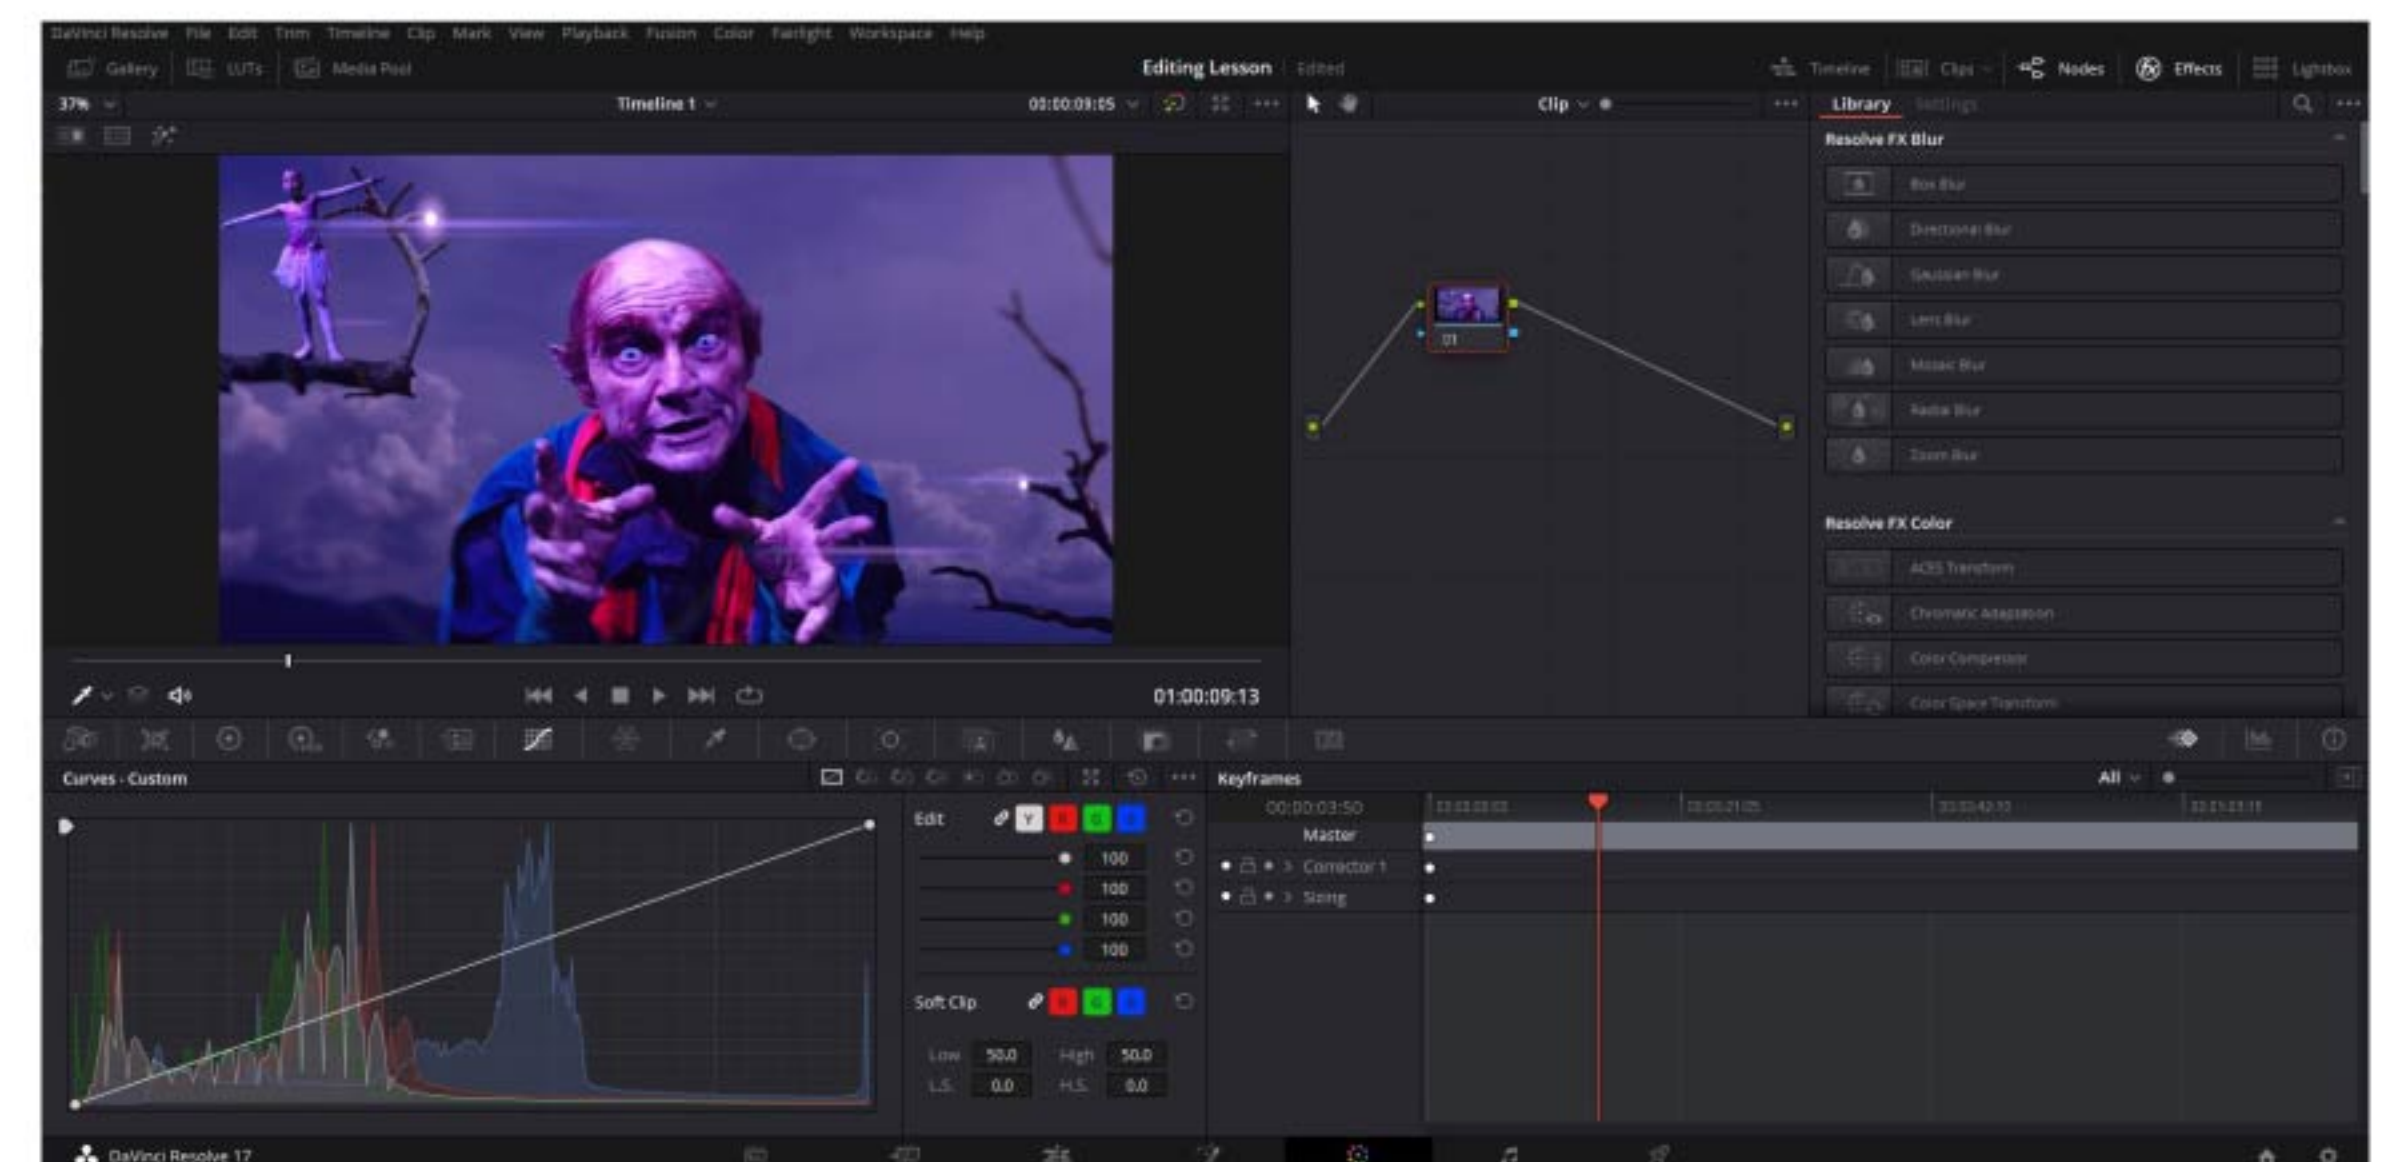

Rayner Digital Labs

This is an online live student-friendly DaVinci Resolve course that is an introduction to video editing using the DaVinci Resolve software. Over 10 hours of interactive sessions, students learn the fundamentals of editing, from importing and organising footage to cutting, trimming, adding transitions, and working with audio, all with step-by-step guidance from an instructor. Ask questions, get feedback, and collaborate with fellow students to bring ideas to life. No experience is needed, just curiosity and creativity!

LESSON PLAN
